

UCC MOTORHOMES

LAUNCH THEIR MERCEDES-BENZ SPRINTER MOTORHOME.

Experience New Zealand without having to sacrifice your home comforts or the security of reliable, personal transportation.

"Our practical, modern, and robust motorhomes provide the best value for money in the market."

- Rob Floris (Managing Director).

Earlier this year UCC show cased their outstanding Benmore motorhome built on the Mitsubishi Fuso 4.9 litre automatic chassis. The market feedback on this product exceeded all expectations, and a number of customers who loved the light weight commercial chassis of Fuso upgraded from their manual Mitsubishi's to the new automatic. The huge 190 horsepower motors satisfied all customers that wanted to keep up with traffic flows, in particular those who wanted to tow something behind their motorhome. A much loved feature was the fact that these motorhomes could still be driven on a standard class one drivers license.

Now UCC have done it again. Proudly introducing their new, second-to-none Mercedes Sprinter motorhome built on the all-encompassing Mercedes Benz Sprinter chassis.

"We wanted to not only cater for the market that preferred a light commercial chassis such as the Mitsubishi Fuso, but we also wanted to produce a leading edge product for those who sought the lighter European van chassis's" - Rob Floris

(Managing Director). The Sprinter with it's front swivel seats, 'true' walk through from drivers cab to traveling home, full automatic transmission that communicates not only with the engine management electronics, but also with the driving dynamics assistance systems such as ABS, ASR and ESP, and standard class one drivers license requirement is a must-see for all those looking to buy a motorhome. The production of the all new Sprinter highlights perfectly UCC's consistent proactive endeavors to anticipate it's customers needs, and raise the standard of motorhomes available in New Zealand.

Currently, UCC manufactures three highly popular layouts for the Mercedes Sprinter:

1. Full front lounge offering complete front and rear motorhome living.
2. Full front lounge with 'walk around' island double bed in rear of motorhome.
3. Forward facing seats (includes full lap-diagonal seat belts). Ideal for those that travel with more than two passengers or children.

The automatic UCC Mercedes Sprinter and Mitsubishi Fuso Motorhomes can be viewed at the upcoming motorhome shows in the North and South Island. 🇳🇿
